

Important Implant Information

Ragle Dental Laboratory now offers Atlantis Custom CAD Abutments as our preferred "standard" abutment. The precision fit, uniform esthetics, and overall design makes this abutment the best choice for all Spline, Screwvent and Nobel Bio-Care abutments. Since Atlantis is custom made we do need to ship this out to Atlantis. Shipping will add additional shipping charges, as well as, increase delivery times depending on the shipping method used. The "standard" procedure will be overnight to Atlantis which then represents a 12 day turnaround for the completed restoration(s). Stock abutments will continue to be available at the current 10 day schedule. Additional shipping charges depend largely on our available stock.

Please review the choices on the back of this card so we may add this as a preference of yours in our Labtrac scheduling software. Return this card with our delivery team. Please do not hesitate to call with any questions or if you prefer email us at info@raglelab.com.

Thank You
