

On the Fly.....

Keeping up with Technology by Jerry Ragle, CDT

My philosophical values have always driven me to seek out new advancements in dentistry continually pushing the envelope in bringing to the dental community products and services that will enhance the delivery of restorative care to the dental patient. Technological advancements are great, sometimes at quite a cost and not much return, but typically they lend themselves to improvements in the overall process in what you receive from Ragle Dental Laboratory. As we improve, I always believe we are never good enough, I want you to know what's coming and going in our world of dentistry. To see what we are up to now click [More Details](#).

A familiar voice soon to leave Ragle Lab

Terri Hoggard, that friendly voice you've heard on the phone when you call Ragle Dental Laboratory will be leaving us this week. Terri started 20 years ago as a delivery driver for the lab and has since held many technical positions with the most recent being the technical advisor to our customers during case planning and scheduling. We wish Terri luck and happiness as she spends more time with her family. You may be wondering who you should call upon now in Terri's absence. Please welcome Natalie (Ragle) Swanson as our new Office Manager and Jamie Matt as Office Coordinator beginning 2/27/06. Also, view our website to see our [Technical Advisors](#) here at Ragle.

What's in the News?

Dr.'s Eric Martin and Nick Sabbia highlighted in the JDT on Prep Design.

[More Details](#)

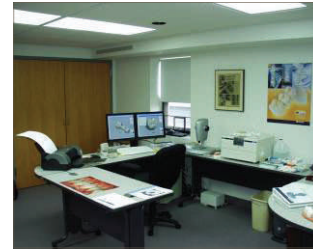

Ragle adds a new milled restorative option. Not only does this add a menu of options but also consistency. [More Details](#)

A Family business?

Newsletter Spotlight

Welcome to our newest Ragle Lab team member Jamie Matt. Jamie joins us as the Office Coordinator, a major player on our Service Team.. You will hear her voice when you call Ragle for scheduling, invoicing or deliveries. [More Details](#).

Training

Being a [Certified Dental Laboratory](#) (CDL) Ragle Dental Laboratory must uphold high standards of education and Health and Safety. Each year [Safelink](#) visits Ragle to keep our team up to date on the many regulations laboratory's must comply with daily. Ragle is the only Certified Dental Lab in Central Illinois.

Continuous improvement is paramount at Ragle. Ragle employees, whether new or existing, must adhere to standards set forth by Jerry Ragle, CDT. The laboratory uses the PTC Verification 2000 training system along with their own developed Procedure Manuals in maintaining the quality service, restorative excellence and technical knowledge in serving their clients. Ragle's Director of Training shown left.
