

On the Fly.....

SEE HOW JERRY CONTRIBUTED IN AGDIMPACT — ENSURING A POSITIVE OUTCOME

One Month left of the Captek™ Promotion

Our New Years resolution this year was to provide our customers with a more affordable Captek™ crown in 2008. Many of you have taken advantage of this promotion. We really believe in Captek™, now more than ever, especially since Nano technology and GC's pressable porcelain gives us a consistent, predictable result every time.

All things must come to an end. Rising costs have forced us to review our Captek™ promotional price structure. But it will remain in effect through the end of September.

Only through September 30, 2008

Captek™ crowns are still only \$ 178

If you've not tried them, now is the time.

Captek™ ...a premium crown at a very low price.

Captek Nano™

Why you should care.

For those of you using Captek™ you don't have to be sold on the product. For those of you who have not tried it, here's one more reason to give it a look.

Captek Nano™ is here! Nano technology takes this premium restoration to the next level. The unique nature of the Captek™ composite metal has not changed, thank goodness, yet by incorporating Nano technology the harder and stronger elements are increased in density by 100%. The smaller particle size dramatically enhances the physical properties with additional hardness, strength and thermal stability.

The Nano sized platinum and palladium particles not only increases strength it also lowers the gold content. Why should you care? Less gold means more stable pricing. In fact, much more stable than even traditional PFMs, which have a "plus metal" charge. Esthetics, health, easy to use... and now stronger and predictably priced...

So why not do yourself a favor and GO NANO.

Doctors Ask – CAPTEK™ Answers

Is Captek™ healthy? Yes!

71% to 90% fewer bacteria in the sulcus than around natural healthy tooth structure

No harmful oxides

Therapeutic effect on tissue

Best margin accuracy

Should Captek™ be considered for patients with periodontal issues? Absolutely! Captek™ is a healthy solution for all patients that need to keep their soft tissues healthy over time.

Can Captek™ be used where there is more than standard occlusal clearance? Yes. Captek™ can be built up to support all restorative needs.

Can I use Captek™ for Bridges? Yes! Captek™ was originally designed to be a perfect bridge system. High strength is combined with accuracy and esthetics.
